- **Trainers**
 - Amit Balyan
 - Sakshi

PROBLEM STATEMENT

- To create a Course Registration System using full stack development tools and technologies.
- Aim is to maintain the integrity of the system.

Agenda

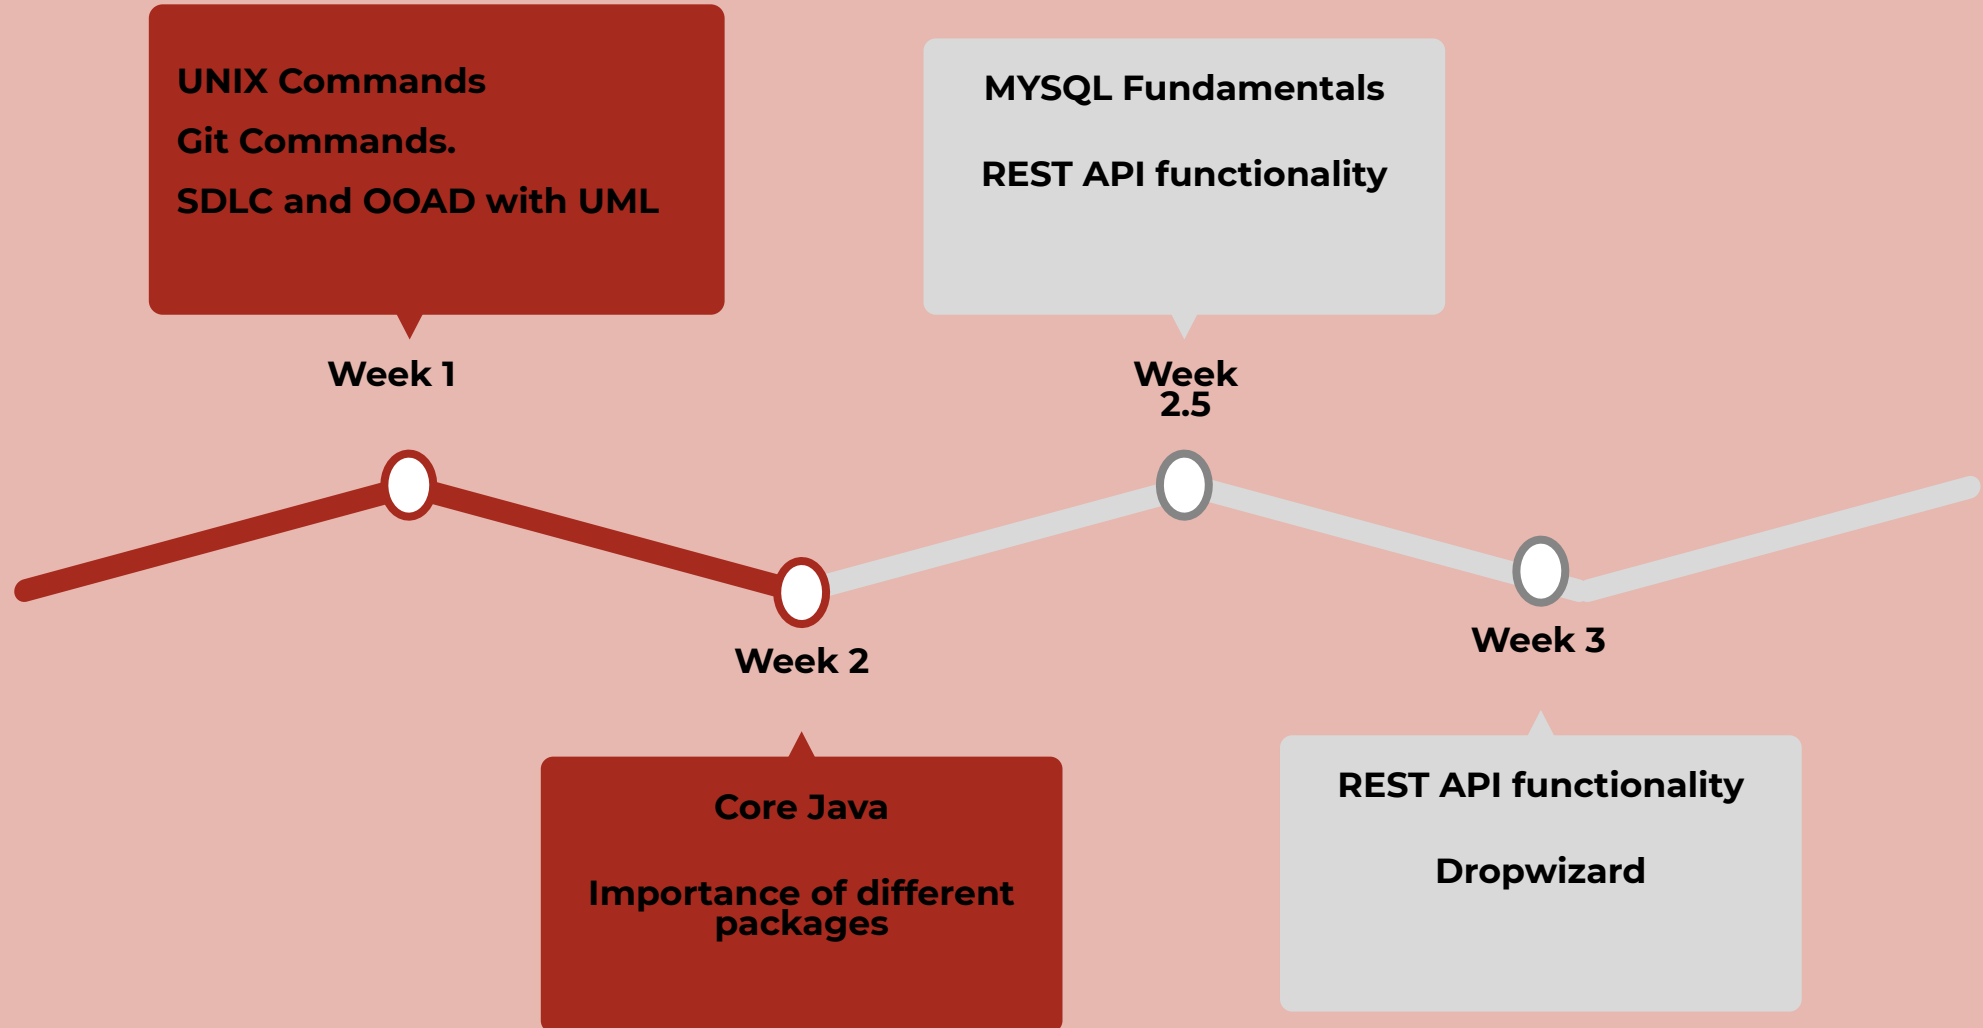

- 01** Our Journey
- 02** Our Team
- 03** Project Goals
- 04** Tech Stack
- 05** Development
- 06** Challenges & Learnings
- 07** Demo
- 08** Questions

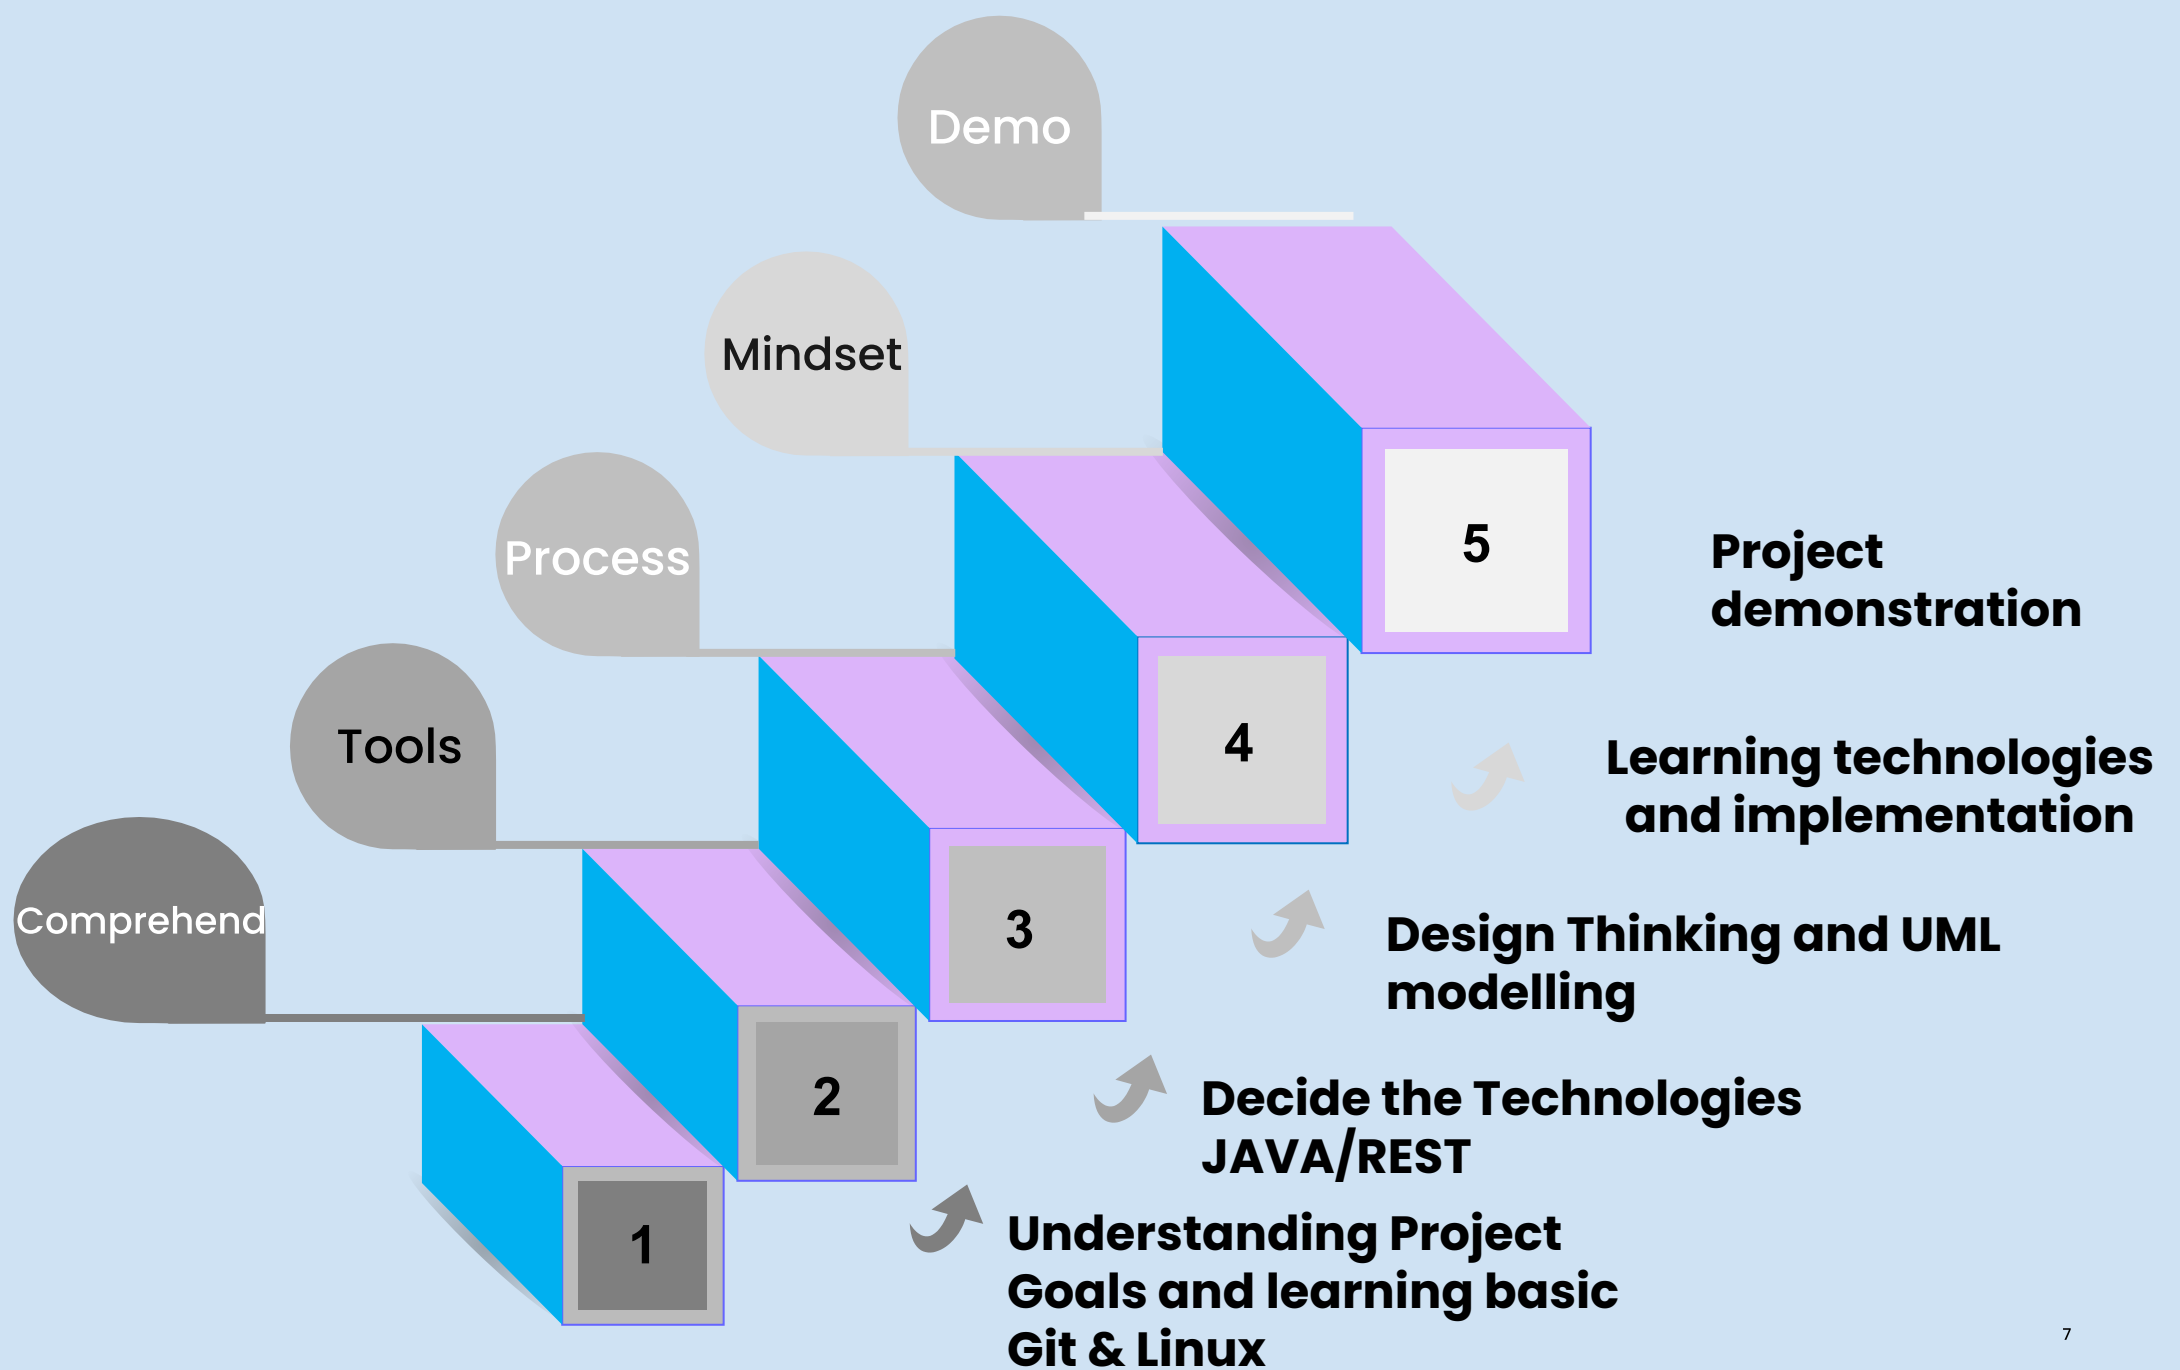

Our Journey

FRAMEWORK FOR 3 WEEKS

Our Team

Amita Joshi

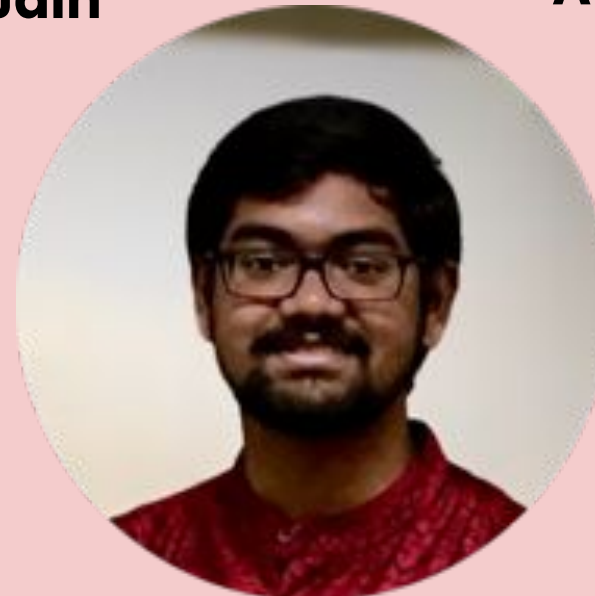

Abhishree Jain

Aditya Nahata

Lovish

Surya Sidhartha

Project Goals

- To understand UML artifacts, backend technologies and frameworks, and successfully create a course management system using the use case diagrams

Tech Stack

Dropwizard

Jersey

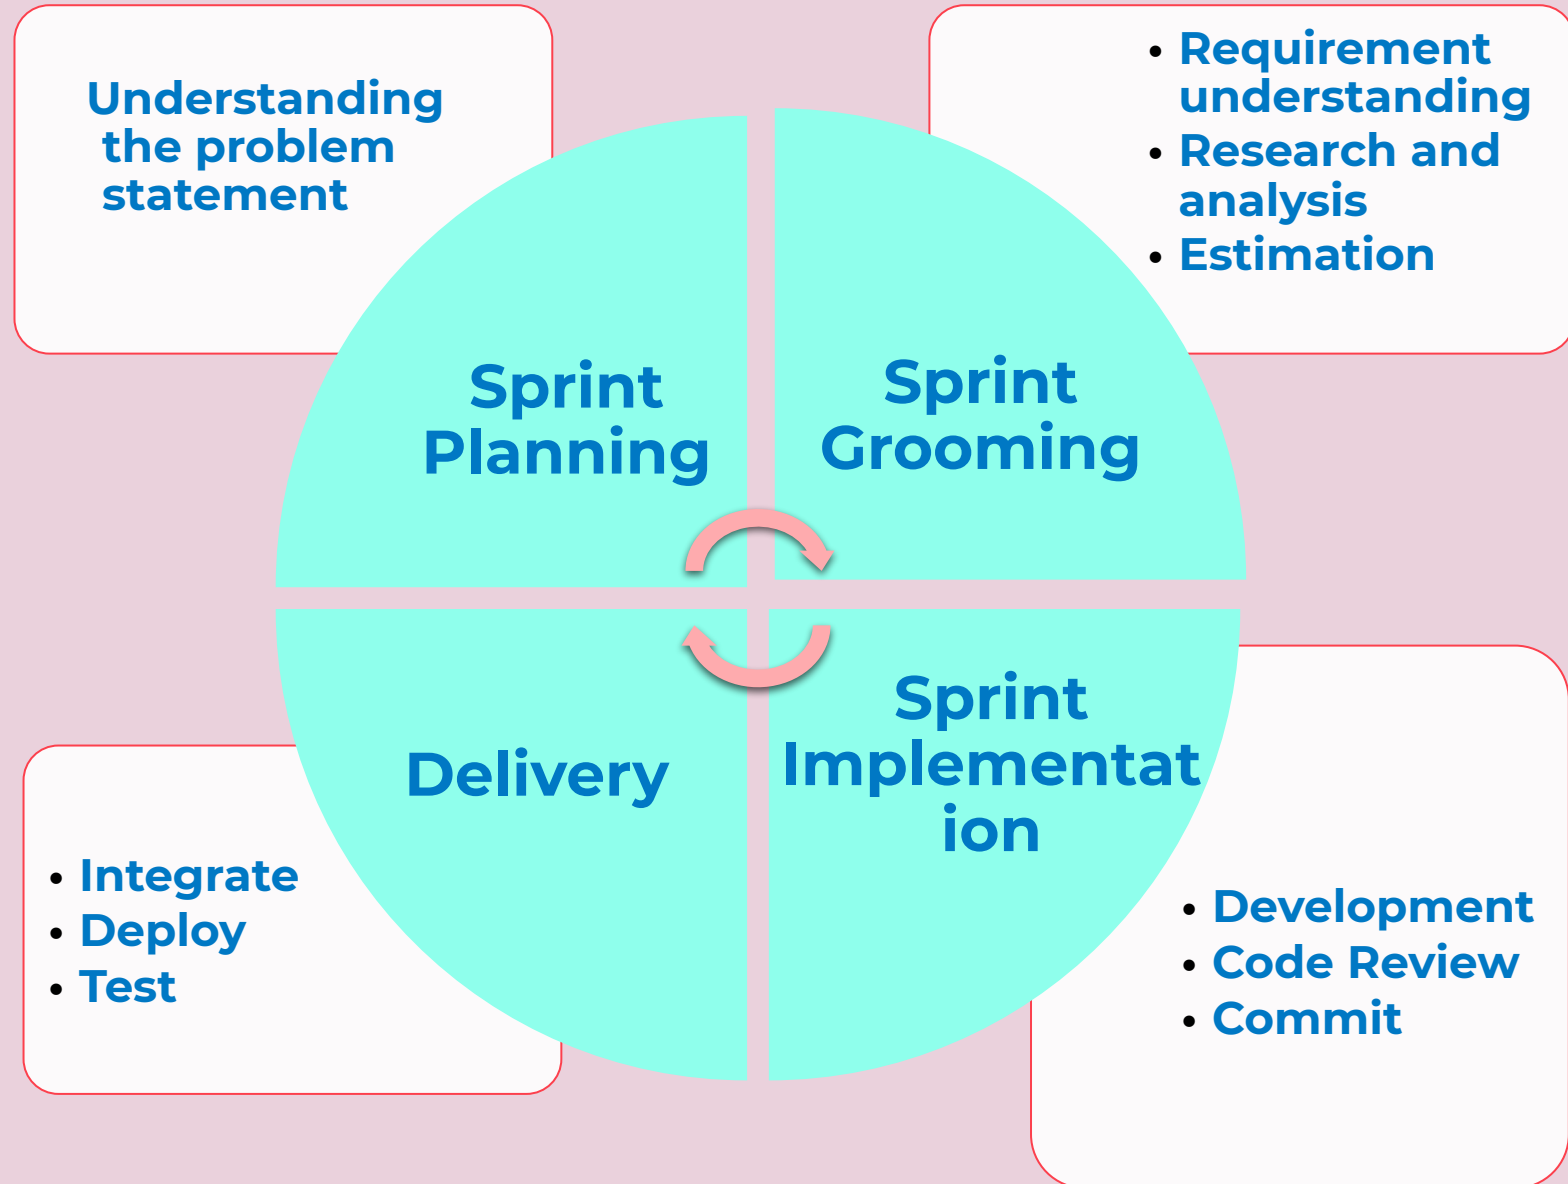

RESTful Web Services in Java.

git

Development

Challenges & Learnings

1. Setting up environment for different parts of the project
2. Resolving errors and refactoring the code
3. Learning importance of versions while using different features
4. Solving merge conflicts while using Git
